PIAZZOLLA PORTRAIT

Astor Piazzolla Tribute - TANGO NUEVO

The Music

Astor P. Piazzolla is considered among the most influential musicians of the 20th century. He has been able to mix jazz, classical and contemporary sounds to the rhythm of tango. There is a strong bond between Italy and Argentina, many of the greatest tango composers and musicians are from Puglia: Troilo, De Angelis, Di Sarli, Pugliese, De Caro, Piazzolla indeed. Italian passion and blood flow in the veins of Argentines. Italian immigration created an entire country.

Five musicians will have the honor of interpreting this evocative portrait, fusing tango and milonga with an intelligent use of electronics. All without losing the charm of an ensemble that includes traditional instruments such as guitar, bandoneon and violin.

The artistic direction and the arrangements, between rock and world music references, are entrusted to **Magasin du Café**, in their original and suggestive style that has made them appreciated in theaters throughout Europe.

In this special edition they will be the ones to play Astor's immense passion for his land and a tradition that is now a world heritage.

Astor Piazzolla is courage and passion.

It is the courage to follow the ingenious intuition that the tango was to be listened to and not just danced, that it could be elevated to an academic repertoire.

This concert-tribute brings to the stage the most intimate and at the same time most energetic soul of the Argentine composer.
